INTRO

DevOps Engineer working on automation, containerized infrastructure, and CI/CD pipelines in Linux environments, with a security-focused background from 2.5 years in SOC operations.

EDUCATION

Bachelor of Computer Science
Amirkabir University of Technology (Tehran Polytechnic) | 2018 – 2024

EXPERIENCE

Arcaptcha   arcaptcha.co | Feb 2026 – Present
DevOps Engineer
- Improved internal infra by moving core services and tools (like MinIO, n8n, Nexus) into a Kubernetes cluster for easier management and scalability
- Built an Ansible-based Docker image scanning tool to improve container images security
- Set up a Prometheus and Grafana monitoring stack for internal services and created dashboards with a focus on security
- Automated GitLab Runner deployment and configuration using Ansible, reducing manual Runner setups
- Designed HA Postgres, Mongo, and Redis clusters using Docker Compose, automated with Ansible
- Implemented TLS between one internal service and its database using Kubernetes cert-manager to secure communications

DevOps Intern   Nov 2025 – Feb 2026
- Assisted in Linux server administration and infrastructure setup.
- Deployed and tested applications in a Kubernetes (k3s) environment.
- Assisted in Kubernetes deployments and basic ingress configuration.

Central Securities Depository of Iran   csdiran.ir | Apr 2023 – Oct 2025
Security Analyst (on-site - via Saba System Sadra)
- Joined as one of the first members of a newly formed SOC team and helped build its initial monitoring structure
- Built 30+ production SPL searches and dashboards used daily by SOC analysts and IR teams
- Organized monitoring across key sources like Windows systems, Sysmon, Linux, Active Directory, WAF, and endpoint security, improving infra visibility
- Deployed real-time dashboards on SOC wall monitors for continuous event monitoring
- Created a structured incident documentation process to improve investigation continuity
- Worked with SIEM engineers to improve log onboarding and centralized logging
- Helped onboard and guide new SOC analysts on dashboards and monitoring workflows

Saba System Sadra   ssystems.ir | Dec 2022 – Apr 2023
SOC Analyst Intern
- Assisted in monitoring security alerts and log analysis.
- Studied SOC processes, incident handling, and SIEM concepts.

DigiAhan   digiahan.com | 2022
Office Manager
- Managed daily operations and customer communications

SKILLS & TECHNOLOGIES

Infra: Kubernetes, Docker, Docker Compose, Linux (Ubuntu), Helm
Automation & Config Management: Ansible, Terraform (learning)
CI/CD & Version Control: Git, GitLab CI, ArgoCD
Observability: Prometheus, Grafana
Networking & Services: DNS, Nginx, TLS, web server configuration, basic network troubleshooting
Scripting and Programming: Bash, Python, Go (basic)
System Administration: Service management, user & group management, permissions, system troubleshooting
Security: Splunk ES, log analysis, network traffic analysis, Sysmon investigation, MITRE ATT&CK basics

CERTS & TRAINING

Professional DevOps Engineer – Arvan Academy
LPIC-1, LPIC-2 – Iran Linux House
Docker, Networking with Linux – Iran Linux House
Networking Basics – Cisco
Introduction to Git and GitHub – Google

Projects & Certificates: sinae99.github.io
